Operation Name: _____ **Date:** _____

► The international market assessment is dependent on the certification to the US National Organic Program and/or the Canadian Organic Regime as the base level of compliance.

► All operators requesting direct and full EU evaluation will need to complete this form. If you are located outside of the US and are shipping product directly to the EU you will need this certification.

► Operators applying for certification under EU standards need to enclose an additional US $100.00.

Oregon Tilth offers full review and certification to the EU standards (ACB EU Equivalent Standard). If you are within the US or Canada you may be eligible to ship products to an EU member state under the government equivalency agreements. However, if you are outside of the US of Canada and shipping to an EU member state or to a buyer who is shipping to an EU member state you will need this full EU certification.
